French Polisher What does the title French Polisher mean to you? Perhaps it makes you think of times past, an old workshop with maybe a kindly old craftsman looking over half glasses, nodding knowingly. Well maybe he exists somewhere, but he is now more likely to be working in a modern place, aided by machinery and suffering noise from compressors supplying spray equipment with air extraction fans humming, with the hiss of spray guns applying modern finishing materials that bear little resemblance to French polish. At Furniture Diamond French Polishers the only way is the old way. French Polisher What does the title French Polisher mean to you?
