Piano Rental in Berkshire, Surrey, Hampshire & London We have found that many of our customers love the idea of our low cost piano rental scheme, enabling them to have a real acoustic piano in their home for all the family to enjoy. Many parents are nervous about buying a piano until their son or daughter has had a number of lessons to see if the piano is the right instrument for them to learn. This goes for many adults too, who may be interested in learning to play the piano. Our piano rental packages start from only £45 per month for a second hand upright piano. This comes with a piano delivery and collection charge of only £95 to get the piano to you and back again should you not wish to continue with renting that particular piano. We ask for a minimum of 6 months rental as this appears to be the optimum time when deciding to either make a purchase or to continue renting. Alternatively, if things haven't gone according to plan, simply call us and we shall collect the piano at no further cost.
