Why choose our Home Piano Rental with Purchase Option? The decision to purchase a new or restored piano could turn out to be costly should the interest fade or you decide you prefer another piano. It is also unwise to spend too little buying a piano, since a cheap instrument will have a poor tone, poor touch and tuning instability and it will discourage, rather than encourage the budding pianist. The alternative is our Home Piano Rental with Purchase Option. This 12-month scheme will cost no more than the outlay required for a typical unsound old upright piano, e.g. £384. It will have the distinct advantage of being a fully guaranteed new or nearly new instrument, with good touch and tone, thus providing the player with maximum encouragement.
